

Training Factor 2 (logrank cutpoint)

A. Enrichment relative to marginal

B. DeCAF by PuriST × Risk group

Fisher Classical: $p = 0.866$ Fisher Basal-like: $p = 0.550$

C. Sample counts

Classical / restCAF	24	95
Classical / proCAF	20	74
Basal-like / restCAF	4	14
Basal-like / proCAF	13	29

Risk group: High, Low
