

Training Factor 1 (logrank cutpoint)

A. Enrichment relative to marginal

B. DeCAF by PurlIST × Risk group

Fisher Classical: $p = 0.057$ Fisher Basal-like: $p = 0.321$

C. Sample counts

Classical / restCAF	207	95
Classical / proCAF	172	110
Basal-like / restCAF	19	15
Basal-like / proCAF	44	54
	High	Low
	Risk group
