Detailed description: This table provides the 'Number at risk' for each group at various time points. The columns represent time points at 0, 5, 10, 15, 20, and 25. The rows correspond to the four groups defined in the survival plot. The counts show the number of individuals remaining at risk for each group at each time point, with the total sample size for each group being 31 except for the Factor 6 High / Factor 2 Low group which has 31 at time 0 and 2 at time 5.
