

Validation KM (Dijk): k=8, alpha=0.00, ntop=300

Strata + Low + High

Number at risk

Strata	Low	High								
0	79	11	28	1	9	0	4	0	0	0
30										
60										
90										
120										

Time

This table provides the number of individuals at risk for each stratum (Low and High) across different time points. The data shows that by 120 units of time, all individuals in the High stratum have been lost to follow-up, while approximately 5 individuals remain at risk in the Low stratum.
