Training (cindex cutpoint)

A. Enrichment relative to marginal

DeCAF | PurIST

Observed − Expected proportion vs Risk group (High, Low)
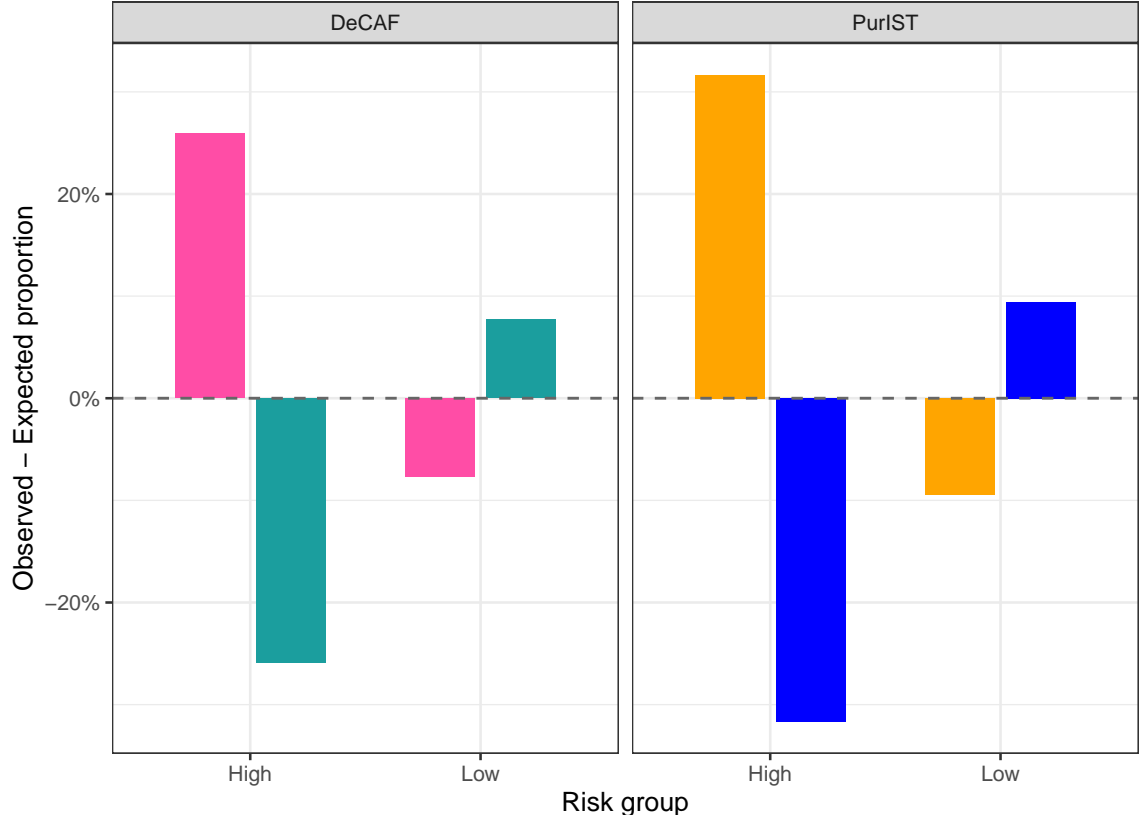

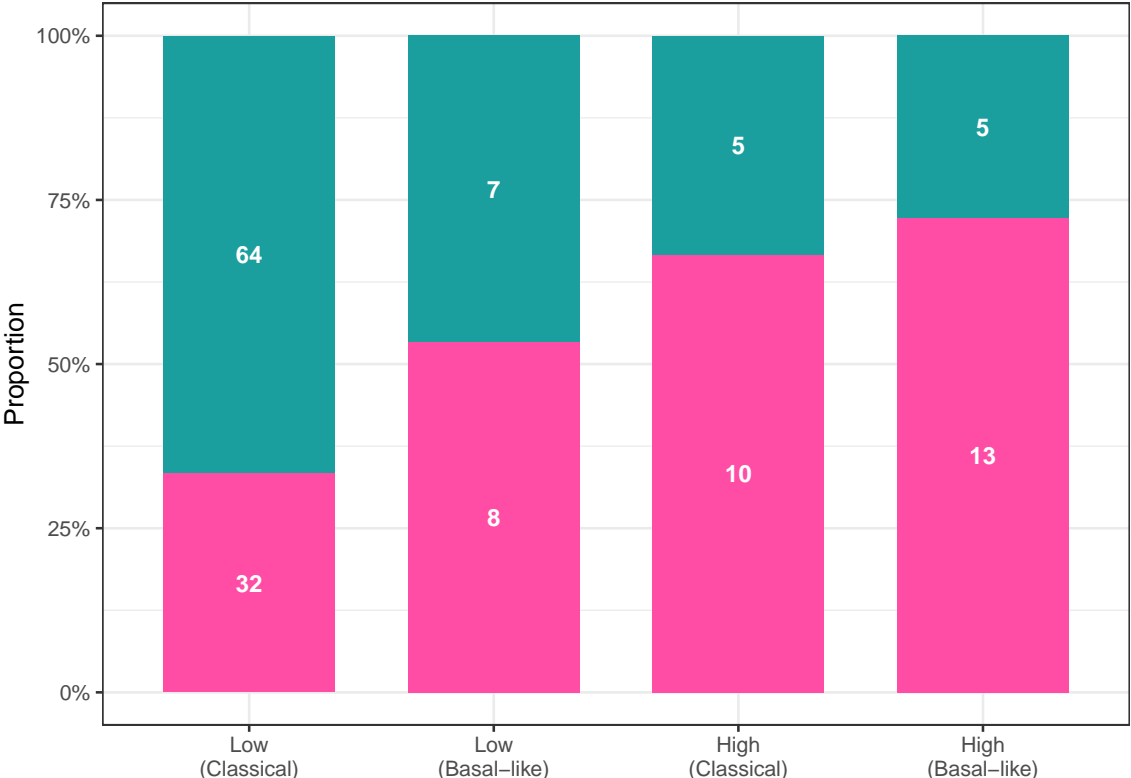

Subtype: Basal-like, Classical, proCAF, restCAF

B. DeCAF by PurIST × Risk group

Fisher Classical: p = 0.021   Fisher Basal-like: p = 0.300

Proportion by Low (Classical), Low (Basal-like), High (Classical), High (Basal-like)

Values: 64, 32, 7, 8, 5, 10, 5, 13

DeCAF: restCAF, proCAF

C. Sample counts

	High	Low
Classical / restCAF	5	64
Classical / proCAF	10	32
Basal-like / restCAF	5	7
Basal-like / proCAF	13	8

Risk group
